- **Time:** Sat 11:25 am – 11:55 am
- **Format:** Live Event
- **Difficulty:** Introductory
- **Track:** Creative
- **Presenter Location:** In-person
- **Experience:** several-th time speaking

Description:

GNU/Linux Loves All is a project that makes microtonal music accessible through FLO (Free/Libre/Open) software. *Microtonal* refers to anything beyond 12-EDO (standard tuning). Through microtonality, musicians can explore the harmonic series and all the tonal spaces between conventional notes.

FLO technology supports our Human Tech Rights by ensuring freedom, openness, and user control. This session highlights how FLO tools empower musicians to create, explore, and share microtonal music — opening the door to richer musical expression and a more equitable technological future.

Target Audience:

- All people
