

# Building Nextcloud Apps in Python and Beyond

- **Speaker:** Edward Ly
- **Room:** CC 202
- **Time:** Sat 2:00 pm – 3:30 pm
- **Format:** Hands-on Lab (90 min)
- **Additional Format:** Workshop/Tutorium (all-day)
- **Difficulty:** Introductory
- **Track:** Development & Dev Tools
- **Additional Tags:** Self-Hosting
- **Presenter Location:** In-person
- **Experience:** several-th time speaking
- **At:** anywhere

## Description:

Have you ever wanted to develop a Nextcloud app, but do not have any experience with PHP as required for traditional Nextcloud apps? To reach a wider developer community and expand what Nextcloud apps can do, Nextcloud has introduced **AppAPI**, a new app ecosystem that allows you to build an External App (“ExApp”) in your favorite programming language.

This workshop explains what AppAPI and ExApps are and walks through a tutorial demonstrating how to develop a simple ExApp in Python.

A GitHub account is required for participation, as the workshop uses GitHub Codespaces.

## Target Audience:

- Developers of all skill levels
