

Scaling PostgreSQL; Citus vs TimescaleDB, Choosing The Best-Fit

- **Speaker:** Robert Bernier
- **Room:** CC 202
- **Time:** Sat 10:30 am – 12:00 pm
- **Format:** Hands-on Lab (90 min)
- **Difficulty:** Expert
- **Track:** Development & Dev Tools
- **Additional Tags:** DevOps, Creative
- **Presenter Location:** In-person
- **Experience:** umpteenth time speaking

Description:

Anybody with a few years of experience as a PostgreSQL DBA has heard of the CitusDB and TimescaleDB extensions. For those familiar with repositories and GitHub, installing these extensions is straightforward. But the real question is: **which one should you choose?**

This session guides attendees toward the best-fit solution by covering the issues that matter and the underlying reasons for selecting one technology over the other.

Target Audience:

- Developers
- DBAs
- Database architects
