

<https://livingcartoon.xyz> is available for us to use together, and it's operation is inspired by James previously donating systems for Noisebridge known as [Brony](#) and [Unicorn](#). This time, I'm offering a domain to start.

- Registered with [Porkbun](#). Paid through the year **2036**.

[selfhosted_friend](#) could play very nicely with this domain, for experimental usage!

- API access can be scripted, perhaps through a Git repo.
- DNS alteration encouraged. Porkbun [uses Cloudflare by default](#).
- Self-hosting encouraged, perhaps with a duration of time in mind; see [selfhosted_friend](#) for that concept.

Rules

We need to make some, together! What are your expectations and boundaries for such a project? Here is a start:

- Services run through this domain have no guaranteed uptime or functionality; it is up to you to help keep the services you want running, running.
- No Spam, Dox, or other abuse tolerated.

We want your input!

Add your thoughts by editing [xyz_suggestions](#)

Suggestions

Got Questions? Concerns? Other thoughts? Add them respectfully! Thank you.
